

City of Fayetteville Building Safety Division

POLICY & PROCEDURE

Clothes Dryer Exhaust

4" Schedule 40 PVC pipe (ASTM D 2665) shall be permitted for use as a clothes dryer duct when installed under a concrete slab poured on grade.

No more than one (1) elbow shall be allowed in the PVC duct system. This elbow shall not extend more than 1" above the finished floor level.

All fittings shall be solvent cemented.

Clothes dryer ducts shall terminate outside the building and above the finish grade.

Reason: AMC 104.3 Alternative material, methods, equipment and appliances.

The State Administrative Authority has accepted Schedule 40 PVC pipe as an alternative material.
