

City of Fayetteville Building Safety Division

POLICY & PROCEDURE

OK to Cover

Inspectors will use good judgment implementing this policy. When the inspector decides this is appropriate then he should contact the requester and tell them that it is OK to cover. Front desk staff may do this if time permits. The inspector will log the inspection into the software noting that permission was given to cover and why.

Reason: Sometime the workload or conditions outside our control make it necessary to have contractors cover work without an inspection.
