

City of Fayetteville Building Safety Division

POLICY & PROCEDURE

Residential Entry Door Requirements

Entry doors must meet the minimum size requirements of the Building Code. They shall be located at the entrance to the residence and cannot be accessed through a garage. In a multiple door arrangement, the required egress door size of 36" X 80" must be achieved by door hardware that doesn't require any special tool or knowledge. This means that if one leaf doesn't provide the required width then the other leaf must open with a knob or lever and be obvious to the user.
