Sewer Line Insituform Work

Location: Mission, Holly, and Old Wire Rd.

The City of Fayetteville Water and Sewer Division has contracted with Insituform and they will be installing liners in the sewer system in your area. This cost effective lining will improve the integrity of the existing pipes, reduce infiltration and increase flow capacity.

The work is currently underway and will continue through February 2011. During this time they may need to alternate lane closures and create a detour in some areas. All detours will be clearly marked and a crew member directing traffic.

Tentative Dates and Locations with weather permitting are as follows:

January 11, 2011	Hatfield/Holly area
January 12, 2011	1400 Block N. Old Wire Rd / Bucky Fuller Dr.
January 13, 2011	1300 Block E. Mission / N. Old Wire

If you have any questions, please call the Fayetteville Water and Sewer Department at 575-8386.

Thank you for your patience and cooperation.

William Winn, RS
Operations Manager
Water & Sewer Division
